

## ***About the Presenter***

Art has been a member of the Sierra Madre Search & Rescue Team since 1991, and is currently vice president of the Team and chairman of the R&D Committee. He has been researching the behavior of snow anchors since 1995 and has performed testing in many different snowpacks in several western states. Art is currently the Director of Science and Technology at Ultramet, a firm in southern California that specializes in material science, and he's here today to tell us about the work he's done.
